Repetition Penalty Effect

Without Penalty (1.0)

*"The company reported strong results. The company announced strong earnings.
The company showed strong growth. The company demonstrated strong performance."*

⇓

With Penalty (1.2)

*"The firm reported strong Q4 results, with revenue increasing year-over-year.
This performance exceeded analyst expectations and demonstrated effective management.
Leadership attributes success to strategic initiatives."*

Repetition penalty reduces probability of recently used tokens

Typical values: 1.0 (none) | 1.1 (mild) | 1.2 (moderate) | 1.5+ (aggressive)
